CUSTOM BUILT TO MATCH YOUR VISION

With our roots in the field of commercial interior design since 1984, our extensive knowledge base and wide range of tools enable us to coordinate the manufacturing of metal in any shape or size, for both interiors and exterior building envelopes. Our experience and eagerness to assist with design allows us to produce unforgettable architectural features.

A photograph of a modern staircase in a dimly lit interior space. The staircase features steps and railings made of perforated metal, which allows light to pass through, creating a shimmering effect. The steps are set on a concrete base. The background is dark, with a red exit sign visible on the wall. The floor is made of light-colored tiles.

Carritec is synonymous with creative power. We can adapt our portfolio to meet your vision without limitation.

QUALITY IN PRODUCT & CRAFT

At Carritec, we take pride in what we do and how we do it, so you can expect superior craftsmanship as our standard. We carefully select our materials and take into consideration the unique production requirements of your project, allowing us to achieve flawless results when creating custom column covers, ceilings, walls and accessories to enhance your space.
