

PRODUCT DATA SHEET

WALL SYSTEM REED

REED

The REED wall panel system is a heavy duty wall system designed for exterior use. This system provides the greatest resistance against wind and impact loads, and when thermal expansion is a factor. All REED wall panels are custom fabricated and provide a very clean look on 90° corners.

FEATURES

- Heavy gauge (3/16”) aluminum panels
- Progressive installation
- Reveal cover splines provided
- Fabricated completely from aluminum sheets and extrusions

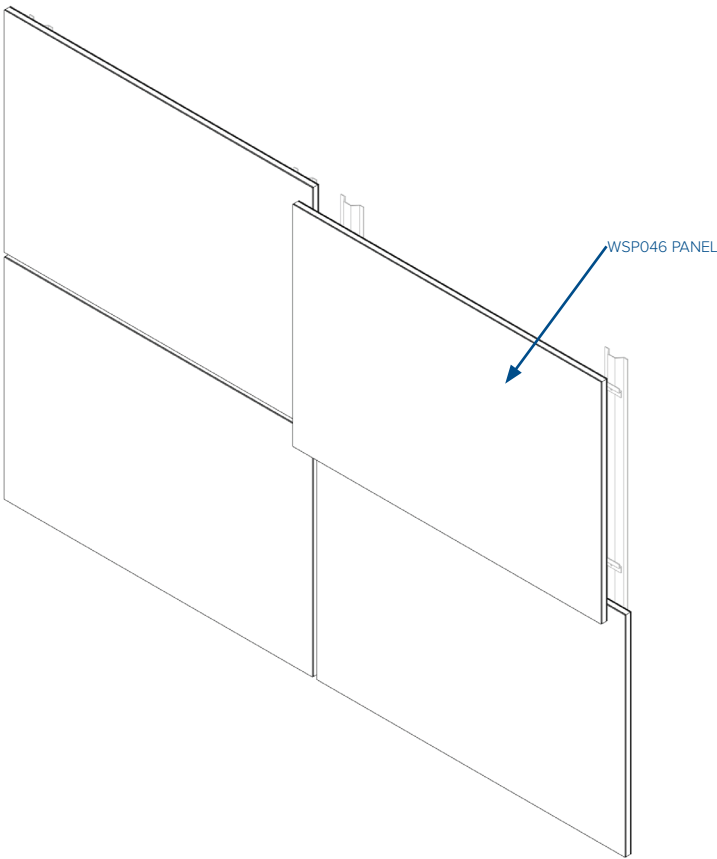

BENEFITS

- Heavy duty exterior wall panel system protects against wind load and impact from pedestrians
- Allows for thermal expansion and water drainage
- Flexible in design and function
- Secure and reliable

FIRE RATING

All metal wall panels and associated suspension systems are made entirely of noncombustible materials and meet all known code requirements.

TYPICAL ISOMETRICS & SECTIONS

ALUMINUM

Material to comply with ASTM B 209, alloy and temper recommended by aluminum producer and finish requested, with strength and durability equal to or greater than the properties of the 3003-H14 for painted or laminated finishes and 5005-H14/32 for anodized finish.

Thickness: 0.032” to 0.050”

WALL SYSTEM REED

COLORS & FINISHES

A wide variety of colors and finishes are available. Options shown below are for illustration purposes only. Custom finishes are available on request. Minimum orders and associated lead times may apply to custom options.
