

PRODUCT DATA SHEET

WALL SYSTEM ZAWN

ZAWN

Designed to be a light-duty wall system, the ZAWN wall system is a progressive installation, interlocking system best suited when material and installation costs are a priority. This system is typically used for exterior applications and is ideal for locations with low wind load and little risk of impact.

FEATURES

- Interlocking panel system with progressive installation
- Horizontal reveals bring the eye to the length of the panels
- Recessed reveal with no visible fasteners

BENEFITS

- Low cost of material and installation
- Secure and reliable
- Rain screen design allows for water drainage
- Flexible in design and form

ALUMINUM

Material type 3003-H14 (painted and laminated finish) or 5005-H14/32 (anodized finish) to comply with ASTM B-209
Thickness: 0.032" to 0.050"

ACOUSTICAL MEDIA

- Non-woven acoustical fabric
- Fiberglass acoustical media encased in black poly or PVC

FIRE RATING

All metal wall panels and associated suspension systems are made entirely of noncombustible materials and meet all known code requirements.
